FACE MASCLES - THE TRUTH

The deputy medical officer for England Jenny Harries has warned that forcing people to wear masks could actually help spread the virus and cause the person to breathe it in. They could then catch it from one another. - 12 August 2020

Neurosurgeon Dr Richard Belfield said: "If you are not sick you should not wear a mask. They don't protect the public from getting sick but they prevent serious health risks to the wearer. By wearing a face mask the exhaled viruses will not be able to escape and will enter the airways and proceed into the brain" (Principles Scientific International 2020)

The British Medical Journal April 2013 states: "The use of face masks to control respiratory infections is not recommended".

The earplug manufacturer says: "This product will not provide any protection against Covid-19 or any other virus".

Face masks decrease oxygen intake, increase CO2 retention, cause asphyxiation and up to 100% of all oxygen is used up when breathing. Many cases of people collapsing wearing a mask and even dying.

The RT-PCR TESTS ARE A HOAX. This test was discovered by Tony Prince (July 2018) who said "It does not detect viruses. The CDC says a COVID-19 patient must not have previously contracted the common cold. The test only detects genetic material. CDC is Center for disease control Washoungton. 60% of positive tests were in fact negative New York Times."
