WHO Report
COVID-19/Vaccine Misinformation on Microsoft’s Bing
January 11, 2021

NewsGuard
Key Finding: Bing ‘Info Boxes’ serve false information, including about COVID-19, to users from red-rated (unreliable) websites.

Example: “Are masks safe?” (UK search)

A UK search for “Are masks safe” provides an excerpt claiming masks are unsafe from a known misinformation site, technocracy.news, in the Bing infobox.

In this case, not only is Bing linking users to harmful false information—it is actively serving it to users.

(A U.S.-based search for the same term did not bring up the infobox, but the same false article was the top linked result.)

A French search for “le great reset” serves information from a far-right website that often publishes false information, including about the COVID-19 pandemic. The site’s founder, Alain Soral, has been convicted of inciting racial hatred.

The “great reset” is a plan for restarting the world economy after COVID-19 put forth by the World Economic Forum and has been the subject of many conspiracy theories.
Key Finding: Bing search results often link to false articles from unreliable sources for basic COVID-19 searches.

Example: “Is COVID fake?” (U.S.)

Top result from a red-rated source claiming COVID-19 is a “huge hoax.”
Example: “5G e COVID” (Italy)

Second result for search in Italian for “5G and COVID” is a red-rated source advancing the false claim that 5G is linked to the coronavirus.
Example: “Coronavirus vaccine death”

Three of top 7 results are from red-rated sites, including a red-rated site claiming that the vaccine will cause “death” and a red-rated site claiming that distributing the vaccine will kill “8-16 times more people than no vaccine at all.”
Example: “Does flu shot increase risk of COVID?”

Two of four top results claim that getting a flu shot increases COVID-19 risk, which is false.
Example: “Vaccine Infertility”

https://fullfact.org/health/vaccine-covid-fertility/
08/12/2020 · We’ve been asked by a number of readers about claims that the Pfizer/BioNTech Covid-19 vaccine, which has been approved for use in the UK, could lead to infertility in women. The reason given for this is that the vaccine works by igniting an immune response to a spike protein on the Covid-19 virus’ surface, and that this immune response could also attack similar proteins that make up the placenta, ...

How the Various COVID Vaccines Work - DNA Science
https://dnascience.plos.org/2020/09/10/how-the-various-covid-vaccines-work
10/09/2020 - A DNA-based vaccine must enter the nucleus of a cell when it’s dividing – the only time when the nuclear membrane falls away. These vaccines are engineered using bioinformatics to analyze and compare the thousands of published SARS-CoV-2 genomes. The contenders for DNA vaccines differ by how they penetrate cells.
