

Microsoft's Copilot

BACKGROUND

AI-powered Microsoft Copilot unifies search, browsing, and chat capabilities to provide a more personalized experience to users. Unlike many other generative AI models, Copilot cites its sources when pulling information from the Internet.

PROBLEM

Without transparently sourced data inputs for fine-tuning and guardrails, generative AI models can authoritatively generate false information ingested from untrustworthy sources. Such models can be weaponized by malign actors to spread false narratives and can mislead unwitting users.

NEWSGUARD'S SOLUTION

Microsoft's partnership with NewsGuard enables NewsGuard's Reliability Ratings and Misinformation Fingerprints to be used in Copilot and inform its output.

Users who have NewsGuard's browser extension installed for free on Microsoft Edge may see NewsGuard's ratings next to Copilot's "Learn More" citations, and Copilot can reference NewsGuard's source ratings data and false narrative debunks in its output.
